

Laser Select Value Proposition

NCR's LaserSelect solution is developed for high speed laser document production centers that want/need to improve operational efficiency, reduce waste, and enhance output capacity in their business.

The NCR LaserSelect solution provides clients with 100% usable rolls, chad free paper and low dust contamination.

Unlike other laser offers, NCR LaserSelect provides unique capability and value in the areas of world class product consistency, exceptional knowledge of the statement production industry, and service levels that include onsite design and problem resolution consulting.

Clients that implement NCR LaserSelect can expect to realize the following benefits in their business: **3-5% increase in out put capacity, waste reductions of 3-8%, service call reductions of 30% and cost reductions of 3-7% on document processing costs.**

Laser Select
